

Kenhancer Plaster

TDDS of Ketoprofen 30mg

Easy-to-use and odourless

Indication

This medication is intended for the symptomatic treatment of painful conditions that affect the joints, muscles, and tendons. These conditions may include rheumatic and muscular pain, arthritis, painful shoulder syndrome, tendonitis and peritendinitis, tennis elbow, sore muscles, and pain resulting from trauma.

Non-Systemic Side Effect

Prevention of common side effects, such as gastric and renal disturbances caused by oral NSAIDs.

Better Absorption

Provided by New Transdermal Enhancer, **Transcutol® + Oleic acid**.

Transcutol® has been used broadly as solubilising agent in local and oral preparations. It is also an excellent enhancer in improving the skin permeability of drug in transdermal system. The absorption of Kenhancer is gradually increased.

Better Efficacy

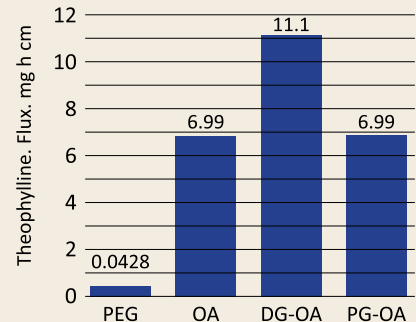

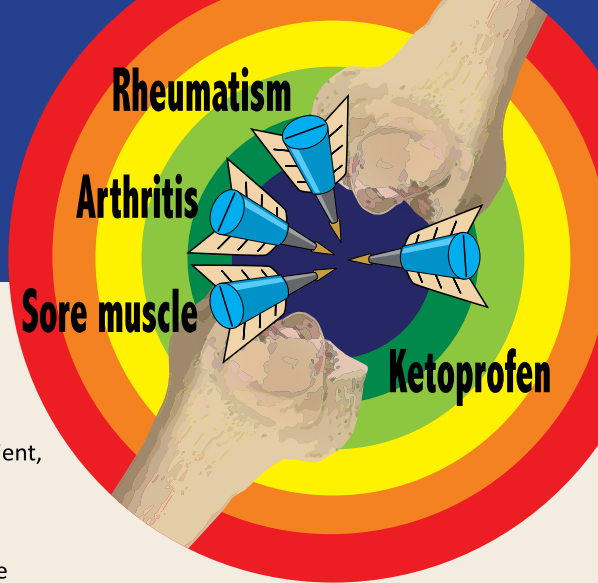

High permeation of active ingredient, Ketoprofen, into the pain area.

Dosage

Apply 1 sheet of Kenhancer to the affected area twice daily.

Packaging

Pack of 6 patches (each 7cm x 10cm)

Effect of enhancers in the form of theophylline through hairless mouse skin from PEG bases. Oleic acid (OA), TRANSCUTOL® (DG), propylene glycol (PG) Ref: Int. J. Pharm. 70(1991) 195-166

Kenhancer targets the pain area with its analgesic and anti-inflammatory effects using TDDS (Transdermal Drug Delivery System) technology for better therapeutic efficacy and fewer side effects.
